Fitstables™

Founded in London, England, Fitstables™ is a British premium brand providing high-quality equine supplements.

Fitstables™ works with award-winning and cutting edge labs and manufacturers, to research and develop innovating and premium equine products.

Fitstables™ supplements are used by many trusted and established stables all across the world.

Every product and ingredients used in the Fitstables™ range, have gone through rigorous testing and quality control, making sure the products are 100% safe and effective. You can trust the Fitstables™ range to provide the highest quality solution for your equine needs.

Equine Gold Paste™

Horses can become stressed by environmental changes, training challenges, and temperature elevations. If your horse gets hot, anxious, or nervous, it can quickly impact their overall health. This happens to horses of all ages and dispositions. It occurs with racehorses and quiet farm animals.

Equine Gold Paste™ is the solution.

This feed supplement is easy to add to whatever your horse loves to eat. There are no needles or complicated regimens. Equine Gold Paste™ is a natural combination of Vitamin E, Vitamin B1, magnesium, and L. Tryptophan. The horse quickly settles from their anxiety and becomes able to better concentrate, focus, and relax.

Recommended for: Racehorses, nervous horses, horses in training

Available in: 3x 35g syringe pack, Individual 60g syringes

Premium MTAZ™

Premium MTAZ is a specialist nutritional supplement, containing a balanced combination of health-promoting minerals and amino acids. It is also a source of bioavailable silicon in the form of calcium zeolite. It is a matter of concern for every breeder whether any newborn foal has the makings of a top athlete. Can they stand up, physically, to the demands of advanced training? Do they have the capacity to race eventually, to compete in related disciplines, for instance? An immature two-year-old will be expected to achieve galloping speeds touching on 35 miles an hour, at a time when their skeleton has not yet fully developed.

When used to augment the nutrition of young horses, including in-foal mares or mares with a foal at foot, Premium MTAZ promotes optimum growth and development.

Available in: 1.2KG, 3KG, 5KG, 10KG, 20KG

Muscle Aid™

Performance horses need the vitamins and minerals necessary to support prime muscle health. Muscle Aid™ has the ideal formulation of Potassium, Iron, Creatine, Omega-3, and 16 other key ingredients to optimally support the elemental health of a horse's system. Carefully optimized for equine health, Muscle Up ensures a horse's biology is fully supported, no matter what challenges they face.

The Muscle Aid™ system enhances not only muscle function and recovery, but also the horse's digestion, pH levels, and microbiome. Every aspect of the horse's health and immune system are boosted and secured with this powerful supplement. This can add weight, girth, and a powerful breath of youthful vigour.

Recommended for: young horses, underweight horses, horses which need to gain strength

Available in: 500ml, 1L, 2L and 4L

Digest Plus™

Stress affects horses of all shapes, ages, and conditions. There can be the stress of environment change, medication change, competition, or natural ageing. If a horse's digestive system is not working properly, it impacts their muscles, immune system, neural systems, and more.

Digest Plus™ provides the solution.

Digest Plus™ can be used as a short-term solution to immediate problems with gastric distress or unusual droppings. It can be a supplement to horses with senior issues or who face ongoing stressful situations due to environment or travel.

A horse's digestion is the foundation of their health. This prebiotic supplement helps ensure they get the protection and support they need.

Recommended for: Horses with digestive issues, older horses, horses facing stress

Available in: 3x35ml Syringes, 60ml Syringes

ProBioVitz™

Researchers present study after study triumphing how critical our microbiome is to health. The way our digestive system processes and handles nutrients impacts everything from energy levels to immune system to sleep cycles and more.

For horses, ProBioVitz™ is the solution.

ProBioVitz™ combines B Vitamins, prebiotics, and probiotics in an optimized blend. This ensures the good bacteria stay healthy and maintain their presence no matter what stresses impact a horse.

From active horses who face travel or other stress issues to compromised horses facing illness or ageing issues, ProBioVitz™ protects them and brings them back into optimal health.

Recommended for: Stressed Horses, Older Horses, Sick Horses

Available in: 1.2KG, 3KG, 5KG, 10KG

Spring Grass™

Horses love carrots – and for good reason. The beta carotene in carrots is critical for a horse's health. A horse eating spring grass would get ample amounts of this precious nutrient. But horses in stabled situations are often woefully depleted.

Spring Grass™ supplement provides the beta carotene, folic acid, vitamin E, and other critical nutrients that stabled horses need for full health. This carefully crafted collection ensures a horse's health is strong from head to toe.

Whether the horse is growing, training, breeding, or coping with stress, spring grass provides that extra boost that keeps the horse happy and healthy.

Recommended for: yearlings, weanlings, training horses, breeding horses.

Available in: 1.2KG, 3KG, 5KG, 10KG

Hoofgrow™

A horse's hooves are the foundation of everything they do. Their stability, security, and strength come from their secure ability to stand, walk, and run. Hoofgrow™ ensures a solid base on which everything else is built.

A horse's hoof is more than a cosmetic nicety. It's what keeps them active and going. It gives them the verve to run and enjoy their day. With Hoofgrow™, brittle and dry hooves become strong and durable. This lotion soaks deep to perform its healing strength to all parts of the horse's hoof system. It's grease-free for a safe, effective result.

Recommended for: Horses with thin nails, horses with brittle nails, horses facing energy issues

Available in: 1.2KG, 3KG, 5KG and 10KG

Vit E Aid™

Vit E Aid™ is a premium food supplement, with added antioxidants, that has been formulated to aid in the prevention of nutritional myopathies in exercising horses. Vit E Aid™ Contains vitamin E, Vitamin C, Selenium, Lysine, Vitamins B1 and Vitamins B2.

Essential nutrients for broodmares and stallions.

Special Antioxidant formula for horses in training.

Enhance Fertility and maintain top condition during competitions

Provides adequate nutrition for high performance and fertility

Recommended for: Horses in training

Available in: 1.2KG, 3KG, 5KG, 10KG, 20KG

Premium Carron Oil™

Every horse needs a healthy digestive system, gut tract, and microbiome. From the youngest foal to the oldest mare, a horse's digestion maintains their health and vitality. Premium Carron Oil supplies the essential fatty acids to ensure a horse takes in high-quality nutrition from what they eat in order to maintain their immune system and energy levels.

Horses need to maintain a proper balance of feed levels and caloric intake. If a horse overeats due to digestive issues, it can lead to colonic issues and serious health problems. With Premium Carron Oil, every mouthful they ingest is processed at the optimal level for health and well-being.

Recommended for: Young horses, horses facing challenges, senior horses

Available in: 1L, 4.5L, 10L

Bioflav™

Active horses put strains on their hearts and the pulmonary system just like any high-endurance athlete. And just like modern athletes, horses need to ensure they are getting the proper nutrients and minerals to support that cardio health.

Bioflav™ is specifically formulated to support healthy heart function in active horses. It's a carefully engineered mixture of Vitamin K, Vitamin C, and other minerals to bring strength and protection to a horse's system. It reduces blood pressure, eases the strain on blood vessels, and restores the function of the critical capillaries.

Whether your horse is stressed by activity, training, or illness, Bioflav™ provides the nutrition necessary to bring them into optimal health.

Recommended for: competition horses and active horses.

Available in: 500g, 1.2KG, 3KG, 5KG

Isocal™

Horses are active animals. When they run, explore, and engage in life, they lose electrolytes just like any athlete. This loss of electrolytes causes dehydration and depletion of energy. Isocal™ ensures the horse recovers and returns to top form.

Through a carefully balanced mixture of potassium, sodium, calcium, and other critical minerals, Isocal™ nurtures your horse's muscles and brings their metabolism back into an even balance.

Active horses sweat and cause imbalances in their systems. Be sure to maintain proper electrolyte levels to prevent "tying up" and other serious issues.

Recommended for: competition horses and active horses.

Available in: 1.2KG, 3KG, 5KG, 10KG, 20KG

Glumob™

Due to their weight, horses often put an inordinate amount of pressure and strain on their joints. Over time, that degradation of cartilage can lead to joint disease, joint lesions, and any number of other serious issues. It's critical to take attentive care of a horse's joints for their long term health and happiness.

Glumob™ contains Glucosamine, MSM, and a variety of other key ingredients to ensure the joints remain lubricated and healthy. It's important to start this regimen early in the horse's life so that its joints stay fresh and stable long before the wear causes irreparable damage.

Recommended for: young horses, active horses, competition horses.

Available in: 1L, 2L, 4L, 5L

Curcunate™

In humans, turmeric has long been known to improve joint mobility and comfort through its curcumin composition. The same has been found to be true for horses. Curcunate™ is specially formulated to bring joint comfort to horses suffering from joint pain.

This is the perfect feed supplement for horses who are in training and competition, for horses recovering from injury, and for horses who are dealing with physical stress issues. It can also be used on an ongoing basis to help ward off future joint issues.

Recommended for: horses in training, competition horses, injured horses.

Available in: 1L, 2L, 4L

Fitstable Equiband™

An antibacterial spray plaster for horses containing Tea-tree oil.

Tea tree oil is a natural antibacterial, antifungal and antiviral essential oil which, when contained in Equiband-Aid, forms a flexible, breathable film which seals out water, dirt and bacteria, lasting for up to two days. This spray plaster covers the affected area like a second skin and allows natural healing.

Available in 500ml, 1L and 4L

Equigest™

Improve horse digestion and body condition. A palatable natural feed additive for horses to improve feed conversion and digestive conditions.

A unique combination of naturally occurring probiotic strains of *Bacillus subtilis*, *Enterococcus faecium* and *Lactobacillus acidophilus* provides gut conditioning and protection against pathogenic bacteria.

Available in 1 kg, 3KG and 250g packs (supplying 168 doses and 42 doses respectively)

Equilyte Electrolyte Paste™

Equilyte electrolyte paste is a complementary feed for use in athletic horses to help replenish electrolytes lost during times of stress, sweating, travel or strenuous physical exercise.

Equilyte Electrolyte Paste should be administered at times of stress – eg during a competition or strenuous physical exercise, or while travelling or in unfamiliar places. The paste form means that absorption begins almost instantly and continues for over an hour, supplying your horse with a reserve of new electrolytes, even as they are being lost through perspiration.

Available in: 12x 35g syringes or individual 60g syringes.

Mintgel E™

This clear gel stimulates blood flow, easing pain and promoting rapid recovery from muscular strains.

Peppermint oil stimulates blood flow, eases pain and reduces inflammation, while lanolin soothes, protects and moisturises. Mintgel E is rapidly absorbed through the skin, quickly easing the pain of strains, bruises, saddle sores and general injuries. It relieves cases of inflammation of the tendons, muscle strain and facilitates mobility. The oil base ensures a prolonged effect after each application, naturally and rapidly

Available in 500ml, 1L and 2L

Prolyte Extra™

To aid/maintain the hydration of horses undergoing intense physical exercise or stress.

Prolyte Extra for Competition Horses is a dietetic complementary feed for the stabilisation of water and electrolyte balance. It is a unique combination of electrolytes with vitamins B and C, plus beneficial lactic acid bacteria.

Available in 12x76g packs

WD Powder™

Fitstables Water Dispersible (WD) powder is a cost-effective means of establishing and rebalancing your horse's natural microflora in the gut.

This powder contains a stable blend of probiotic beneficial lactic acid bacteria (Lactobacillus acidophilus and Enterococcus faecium), in a high-energy carbohydrate base. This product ensures a balance in favour of a healthy gut flora reducing susceptibility to digestive upsets and infections.

Available in a 500g plastic tub which provides 250 foal doses or 125 horse doses.
